## E.4 Organizationally Unique Identifier (OUI)

The first 48 bits of each Ethernet address are called Organizationally Unique Identifier (OUI). The OUI consists of two parts, each 24 bits long. The first part represents the vendor identification, which is assigned to each vendor of IEEE Ethernet components. The second part contains the addressing within such a vendor domain. The most recent listing of OUI codes is available under

<http://standards.ieee.org/regauth/oui/oui.txt>
